

Mission and Vision

The mission of the University Of Missouri Health System Department Of Pathology is to provide the highest level of laboratory diagnostic services to our patients, physicians, and others we serve. Our vision is to be the premier provider of laboratory services in our community.

MUHC Pathology promises to fulfill its mission by:

- Meeting customer requirements. We will provide accurate and timely services that contribute to the quality of patient care.
- Developing and putting methods into service capable of meeting the user's needs for precision, linearity, accuracy, sensitivity and specificity.
- Providing technical and non-technical staff of the highest caliber. Ensuring that all staff members receive training in quality technology, in sufficient depth to enable them to carry out the provisions of their duties and maintain quality improvement efforts.
- Ensuring efficient operational performance of the laboratory. The Laboratory will operate in a financially responsible manner by monitoring costs and maintaining productivity.
- Supporting and validating laboratory methodologies by participating in proficiency testing for all laboratory analytes as required.
- Meet and maintain the highest accreditation standards possible. Ensure compliance with all regulatory bodies, both voluntary and required.

Our goal is to exceed the expectations of those who place their trust in us. This is achieved through continuous quality improvement and our dedication to the core values of our institution.
